What is the study about?
We invite you to take part in a research study that aims to understand how people interpret information about how places change over time, such as records of weather, water levels, natural hazards and other everyday events shown in graphs. You have been invited to take part because you are registered with Prolific and signed up for this study. Please read this information and ask us any questions. You can find our contact details below. You can also talk to someone you trust, like a family member or friend. You can take some time to make up your mind. You get to decide whether this study is right for you.

Who is running and paying for this study?
This study is being run by Dr Omid Ghasemi and Dr Aba Szollosi, UNSW Sydney. This study is being funded by the Australian Research Council (ARC), the UNSW Institute for Climate Risk & Response, and the Australian Academy of Science.

Who can take part in this study?
To take part in this study you need to: be 18 years or older and be fluent in English.

Do I have to take part?
Taking part is up to you. You get to decide whether you take part in this study. You can say yes or no. Your decision will not affect your relationship with UNSW Sydney.

What will I do if I take part, and are there any risks?
If you take part, we will ask you to look at a few graphs, each showing how a phenomenon (for example, temperature) has changed over time in a place, and then answer questions about what you saw and what you think about it. Some questions ask about weather, climate change and natural hazards such as heatwaves, floods and bushfires, and about your views and feelings on these topics. We will also ask a few questions about you, such as your age, gender, education, income and political views. Taking part in this study is not expected to harm you. You can skip any or all questions if you wish. You can also let the Chief Investigator (Dr Omid Ghasemi; o.ghasemi@unsw.edu.au) know if you need help for any reason.

Your time
In total, you will be asked to spend about 5 minutes in this study. This includes the time it will take to read this information, look at the graphs, and answer the questions.

Recompense for taking part
You will receive £0.90 and paid to you through Prolific, as recompense for your time taking part in this study.

What are the benefits of taking part?
By taking part, you will help us understand more about how people understand information about change over time, including changes in weather and the environment. This knowledge may help researchers, teachers and science communicators present data in ways that people

find clear and accurate. We cannot promise that you will directly benefit from taking part in this project.

How will my information be used for this project?
The information that you give us will be kept for at least 5 years (de-identified data shared in online repositories will be kept indefinitely) after the study's completion. We will store information about you in a non-identifiable format at UNSW-approved secure storage (Qualtrics during collection, then UNSW OneDrive). Your information will be used for research purposes only. Your privacy will be protected by not asking for your name, contact details or exact address. Prolific gives us an anonymous Prolific ID, which we use only to pay you and to make sure people do not take part more than once. We remove Prolific IDs from the data before analysis and before any data are shared. Information collected for this study will be made available in a de-identified format to other researchers via online data sharing repositories such as the Open Science Framework (osf.io).

Can I change my mind about taking part in this study?
You can change your mind about taking part at any time. If you do agree to take part, you can stop at any time. You do not have to tell us the reason. Your decision to stop will not affect your relationship with UNSW Sydney. To withdraw from this study you can close the study application or window. Once you stop taking part, we will not collect any more information about you and will destroy the information we have collected about you. However, once you have submitted your responses, we will not be able to destroy the information you gave us because the study is anonymous.

How can I find out the study results?
We plan to share the results of this study including in published journal articles and conference presentations. You will not be identified in anything we report about this study. If you would like to receive a copy of the results, you can let us know by emailing the Chief Investigator (o.ghasemi@unsw.edu.au). We will only use these details to send you the study results.

What should I do if I have questions?
If you want more information about this study, or if you have any problems related to taking part, you can contact the following members of the research team:

Chief Investigator Contact	Name
Dr Omid Ghasemi	Position
Lecturer	Email
o.ghasemi@unsw.edu.au	
Investigator Contact	Name
Dr Aba Szollosi	Position
Lecturer	Email
aba.szollosi@unsw.edu.au	

Who has reviewed and approved this project?
The UNSW, Sydney Human Research Ethics Advisory Panel C – Behavioural Sciences has approved this project.
Comments or complaints about how this study is being run If you have any comments or complaints about this study, please contact the UNSW Human Research Ethics Coordinator stating the study iRECS number below: UNSW Human Research Ethics Coordinator

Telephone	+ 61 2 9385 6222
Email	humanethics@unsw.edu.au
iRECS Number	iRECS12547

Consent to take part in this study: This means you agree to take part.
By clicking the YES button below, I acknowledge that:
I freely agree to take part in this study as described.
I understand that I can stop taking part in the study at any time.
I have read, or have had read to me, the information provided about this research project and understand what is involved including the use of all the information I provide.
I have had the opportunity to consider the information, ask questions and am satisfied with the answers I received.
I have been given or can access a copy of this information statement that I can keep.
I have been given the researchers contact details so I can ask questions about the study.

I consent to take part in this study

- ○ YES I consent to take part (1)
- ○ NO I do not consent to take part (2)
